

# GUIDE FOR COURSE

## COMMITTEES IN THE CHEMISTRY CHAPTER

### 1 Welcome

How nice that you chose to join a course committee! The structure of course committees can vary quite a lot from course to course, so it is good to talk to the teacher early on about how you will set up the collaboration.

#### 1.1 Meetings

You can plan the work exactly as you wish, but so that each course committee does not have to reinvent the wheel, we would like to contribute with a proposal. We suggest an arrangement with two meetings during one course session. Having the first meeting approximately in the middle of the period enables you to contribute to changes and improvements already during your course round. When the course is over, you can meet the teacher again to discuss the entire course, future course participants will thank you for that!

#### 1.2 Collecting opinions

You can choose to collect opinions from your classmates just as you want! We have made a template for a Google form that you are more than welcome to use. When you have collected, you can compile the results so that you can easily present them to the teacher in the course. We in the education board are of course always here to support you! You can reach us via these addresses below.
